

Reed Hodges
Curriculum vitae
Updated Apr 2024

Personal Information:

Name: Reed Michael Hodges
Office: Physics Building 248
120 Science Drive
Durham, North Carolina 27708 USA
Phone: +1 (912) 243-3741
Email: reed.hodges@duke.edu

Education:

PhD Physics Duke University, 2024
Durham, North Carolina USA
Advisor: Thomas Mehen
BS Physics Georgia Southern University, 2018, *summa cum laude*
Statesboro, Georgia USA
Minor: Mathematics

Experience:

2019-*present* Graduate Research Assistant, Duke Univ Dept of Physics
2018-2021 Graduate Teaching Assistant, Duke Univ Dept of Physics
2016-2017 Blue Waters Petascale Computing Intern, Shodor Education Foundation

Publications:

1. M Copeland, S Fleming, R Gupta, R Hodges, & T Mehen (2024). Polarized J/ψ production in semi-inclusive DIS at large Q^2 : Comparing quark fragmentation and photon-gluon fusion. *Phys Rev D*, **in press**. [inspire] [arXiv]
2. M Copeland, S Fleming, R Gupta, R Hodges, & T Mehen (2024). Polarized TMD fragmentation functions for J/ψ production. *Phys Rev D* **109**, 054017. [doi] [inspire] [arXiv]
3. L Dai, S Fleming, R Hodges, & T Mehen (2023). Strong decays of T_{cc}^+ at NLO in an effective field theory. *Phys Rev D* **107**, 076001. [doi] [inspire] [arXiv]
4. S Fleming, R Hodges, & T Mehen (2021). T_{cc}^+ decays: Differential spectra and two-body final states. *Phys Rev D* **104**, 116010. [doi] [inspire] [arXiv]
5. R Hodges, K Rosado-Ayala, & M Durach (2017). Computational approaches to scattering by microspheres. *J Comput Sci Educ* **8**(3), 19-24. [pdf]
6. R Hodges, C Dean, & M Durach (2017). Optical neutrality: invisibility without cloaking. *Opt Lett* **42**(4), 691-694. [doi] [arXiv]

Presentations & Seminars:

1. R Hodges, M Copeland, S Fleming, R Gupta, & T Mehen (Sep 2023). Mechanisms of polarized J/ψ production in NRQCD. Poster presented at the 25th International Spin Physics Symposium, Durham, North Carolina USA.
2. R Hodges, M Copeland, S Fleming, RK Gupta, & T Mehen (Mar 2023). Polarized J/ψ TMD fragmentation functions. Contributed talk at the XXth annual workshop on Soft-Collinear Effective Theory, Berkeley, California USA.
3. R Hodges, SP Fleming, TC Mehen, & L Dai (Apr 2022). Studying T_{cc}^+ decays using effective field theory. Contributed talk at the APS April Meeting, New York, New York USA.
4. R Hodges (Dec 2021). T_{cc}^+ decays: Differential spectra and two-body final states. Effective Field Theory Seminar at Technische Universität München, virtual.
5. R Hodges & TC Mehen (Oct 2021). NRQCD matching calculations aided by the threshold expansion. Contributed talk at the Fall Meeting of the APS Division of Nuclear Physics, virtual.
6. R Steele & R Hodges (Apr 2018). Temperature dependence of the refractive index of soda-lime glass. Poster presented at the College of Science & Mathematics Office of Undergraduate Research Symposium, Statesboro, Georgia USA.
7. RM Hodges & M Durach (Apr 2017). Angular momentum in photonic nanojets due to chirality. Poster presented at the College of Science & Mathematics Office of Undergraduate Research Research Symposium, Statesboro, Georgia USA.
8. RM Hodges & M Durach (Mar 2017). Invisibility of a metamaterial without a cloak. Poster presented at the APS March Meeting, New Orleans, Louisiana USA.
9. RM Hodges & M Durach (Nov 2016). Invisible metamaterial microspheres. Contributed talk at the Georgia Undergraduate Research Conference, Milledgeville, Georgia USA.
10. K Rosado, RM Hodges, & M Durach (Nov 2016). Developing Fortran codes for photonics research. Poster presented at the Georgia Undergraduate Research Conference, Milledgeville, Georgia USA.
11. RM Hodges & M Durach (Nov 2016). Invisible metamaterial microspheres. Poster presented at the Georgia Undergraduate Research Conference, Milledgeville, Georgia USA.
12. RM Hodges, CE Dean, & M Durach (Mar 2016). Scattering on hyperbolic microspheres: from photonic nanojets to Poisson-Arago bright spots. Poster presented at the APS March Meeting, Baltimore, Maryland USA.
13. RM Hodges, CE Dean, & M Durach (Nov 2015). Photonic nanojets produced by all-dielectric and hyperbolic meta-microspheres. Poster presented at the Georgia Undergraduate Research Conference, Statesboro, Georgia USA.
